Battery technology in electric cars is rapidly advancing, so the distance you can travel on a single charge (called the car's range) is constantly improving. Older electric cars tend to have limited range, whereas brand new electric cars can travel up to 350 miles on a single charge, with 150-250 miles being the most common range in modern electric cars.

~~Used Electric Cars for Sale | Second Hand Electric Cars ...~~

Electric cars need servicing, but as they tend to have fewer moving parts than petrol or diesel vehicles, they're often cheaper and easier to service and run. One key difference is the battery will need an occasional health check, just to make sure it's working properly. Most electric car batteries are covered by a longer warranty of around eight years. Related: top tips on charging your ...
