~~Break Apart To Subtract Worksheets - Kiddy Math~~

This unit is part of the Mental Math Strategy Collection. Breaking apart an addend by place value is a powerful mental math strategy for adding numbers with two or more digits. Although this is similar to left-to-right addition, some students prefer it because only one addend is decomposed by place value.

~~Grade 3 Math #1.6, The Break Apart Strategy to Add - YouTube~~

Breaking apart arrays is another effective strategy for students who are learning multiplication, and helps model distributive property. For example: students usually learn their twos and their fives sooner than the larger times tables, so that when faced with a problem like 6×7 , students can instead look at the 7 as a $(5+2)$ instead. Like this: $6 \times (5+2)$ OR $(6 \times 2) + (6 \times 5) = 12 + 30 = 42$.
