(PDF) The LaTeX Companion 2nd ed - ResearchGate

Ah, The LaTeX Companion is usually referred tenderly as TLC. At the risk of being heretic, in my humble opinion this is the Holy TeX Trinity for me: The TeXbook, The LaTeX Companion and TeX by Topic. My favourite, of course, is TLC for obvious reasons: it saved me a lot of times. It was really a friend, a companion.

The LaTeX Companion ebook - TeX talk

I assume (not that they tell authors anything) that the "2nd edition" here refers to the second edition of the latex companion. The 2nd edition (compass book) is much expanded from the first edition (the dog book) and has different set of authors (I wasn't an author of the 1st edition) 1st edition came out around the time of latex2e in 1994 I think, and the second edition was published around ...

books - LaTeX Companions Third Revised Boxed Set - The

The LATEX Graphics Companion, Second Edition, is more than ever an indispensable reference for anyone wishing to incorporate graphics into LATEX. As befits the subject, the book has been typeset with LATEX in a two-color design.

The LaTeX Graphics Companion: Illustrating Documents with

The authors are renowned masters of LaTeX, without argument, but they have written something that is solely useful for the professional who would, perhaps, be studying, specialising, or earning a living from LaTeX itself, by knowing all its details, but not the common user or advanced user, who are interested in understanding the operation clearly and applying it to their articulate documents.

Amazon.co.uk: Customer reviews: The Latex Companion

This book, The LaTeX Companion, is packed with information needed to use LaTeX even more productively. It is a true companion to Leslie Lamport's original user's guide book, LaTeX: A Document Preparation System, now in its second edition, and indeed, it is a valuable complement to any LaTeX introduction.

LaTeX Companion, The + InformIT

The LaTeX Companion has long been the essential resource for anyone using LaTeX to create high-quality printed documents. This completely updated edition brings you all the latest information about LaTeX and the vast range of add-on packages now available—over 200 are covered!

The LaTeX Companion (2nd Edition) - Mittelbach, Frank

The LaTeX Companion is something between an advanced course tutorial (could just as well be named Selected Chapters from LaTeX) and a reference book. None of them was ever aimed at beginners, and this one is no exception. LaTeX comes with a rich legacy of add-on macro packages doing various useful and nifty things with lists, floats, tables ...
